## KEY SPEAKER

**DR GULSHAN RAI**

With more than four decades of experience, Dr Rai recently retired from his position as Cybersecurity Chief in Indian Prime Minister Office. He has been instrumental in creating critical infrastructure and Incident Response mechanisms. He was the key person to set up CERT-IN.

In the age of technical modernization, array of new opportunities and potential sources of efficiency for organisations of all sizes emerge but these new technologies have also brought unparalleled threats to economy and populace all over the world. Hacking of data and information has become almost a daily affair in all parts of the globe. Cyber security involving protection of systems, networks and data in cyberspace has become a critical concern for all businesses. It is the need of the hour that credit cooperatives take effective cyber security measures to ensure safety and reliability of their organisations and customers. COVID 19 pandemic has added a new dimension to the risks in the light of fact that increasing number of customers and employees of credit cooperatives are using the online mode for transactions. Most often than not the credit cooperatives because of a variety of reasons are not adequately face the cyber risks and mitigate them. Against this backdrop, NEDAC Training Centre, Bangkok upon the request of its valued member, KUSCCO is going to organize a technical webinar for the Kenyan cooperatives. The key speaker has rich practical experience in defence against and mitigation of cyber risks.

**“Cyber attacks are continuously evolving—to a great extent faster than cyber defences—resulting in an ever-increasing frequency of attacks and the probability of success over time.”**
